The Republicans of the State are tantalizing the Democrats over the state debt. Just stop and reason, Mr. Republican. One-half the present debt was inherited from your administration, and this to in the face of the fact that the Willson administration instead of inheriting a debt from the Beckham administration, inherited over a million dollars surplus Then too, it should be considered that our schools are now costing us a great deal more than they did in the first of the Willson administration. We now have six months school in every district instead of five as formerly. It costs more to have six months schools than it does to have five. We, therefore, have more to show for our indebtedness than we did under Republicar control, and still The Times has not called attention to this to exonerate the present administration, but do so merely as a comparison with the Willsou administration to show that there have been worse administrations than the present.

It occurs to the Times that some of our Representatives at Frankfort are anning to build a reputation this winter on the point of ecouomy to pay the state debt. This is not as it should be. The state can pay its debts and still maintain its institutions. The Times believes in spending money wherever it is necessary, but of course it does not believe ititions.
